PROFILE

I am Job Idiahi Okosun, a software engineer at Mira Technologies, based in Lagos, Nigeria. I hold a Bachelor of Science degree in Computer Science and have five years of experience architecting and developing scalable, secure, and reliable web and mobile applications. My skills span a wide range of technologies, including Node.js, Python, Angular, React, TypeScript, JavaScript, PHP, SQL, NoSQL databases, cloud technologies, and DevOps.

I have successfully contributed to various web and enterprise applications and I possess excellent communication skills and thrive in dynamic environments.

SKILLS

Frontend Development ● ● ● ● ●
HTML, CSS, Javascript, Typescript, Tailwind, Angular, React

Backend Development ● ● ● ● ●
Aws, Node, Nest.Js, Express.Js PHP, Python/FastAPI

Database Technologies ● ● ● ● ●
MySQL, Mongodb, Mongoose, Redis, Elasticsearch

Mobile ● ● ● ● ●
Angular/IONIC

Testing Frameworks ● ● ● ● ●
Jest, Mocha, Cypress

DevOP Tools ● ● ● ● ●
Git, Docker, Jenkins, CircleCI, Github Actions

PROFESSIONAL EXPERIENCE

08/2022 - Present
Lagos, Nigeria

Software Engineer
Mira Technologies

- Translate UI/UX designs into functional front-end code.
- Supported the integration of third-party APIs for Fintech softwares.
- Implemented unit tests ensuring code quality and reliability.
- Assisted in CI/CD pipelines to streamline deployment processes,
- Built numerous scalable APIs and backend services.
- **Stack used**: Angular, React, Typescript, Javascript, PHP, Python, Node, Docker, CircleCi, Jest, Mocha, GitActions

05/2021 - 05/2022
Abeokuta, Nigeria

National Youth Service Corps (NYSC)
Bureau of Information (BIT)

- Improved and maintained database systems for managing office records.
- Provided IT support and training for staff, enhancing technical capabilities.
- Volunteered at as STEM tutor
- **Stack used**: HTML, CSS, Javascript, SQL

04/2020 - 05/2021 Abuja, Nigeria	**Software Engineer** *Rymkys Enterprise Corporation*

- Optimized REST APIs to achieve a 15% reduction in response time, enhancing data interchange between the server and users.
- Contributed to the development and maintenance of server-side logic for new and existing products.
- Researched and implemented new client-side features to improve user experience.
- Developed automated tests to ensure code quality and reliability.
- **Stack used**: Node.js, Angular, React, MongoDB, JavaScript, Python, REST APIs, Jest, Mocha, Git

11/2019 - 04/2020 Edo, Nigeria	**Software Engineer** *Harvadcom Consult*

- Identified, measured, and continuously improved backend processes to enhance system efficiency.
- Resolved data duplication and inconsistencies through cleanup and automation.
- Integrated the MVC pattern into an information management system, improving modularity, organization, and scalability.
- Deployed applications to cloud platforms and monitored their performance to ensure reliability.
- Stack used: Node.js, PHP, JavaScript, MVC Architecture, AWS, Nginx Git, SQL

EDUCATION

11/2015 - 11/2019 Ekpoma, Nigeria	**B.Sc	Computer Science** *Ambrose Alli University*
05/2018 - 11/2018 Benin, Nigeria	**Software design and development certificate** *Harvadcom Consult*

CERTIFICATE

Certificate of Appreciation @BIT
I was awarded this certificate in recognition of my volunteer work as a tutor in the STEM program organized by BIT.

B.Sc @ Ambrose Alli University
This is a certificate awarded for completing the study of bachelor of science degree at the university.

LANGUAGE

English, Esan
